

ROTOBALE COMPACTION SOLUTIONS INC.

Vertical Compactor RV-4 / RV-6 / RV-8

The Rotobale line of vertical compactors has been specifically designed to contain wet or dry waste materials. They eliminate the use of unsightly open refuse containers and minimizes the possibility of pilferage and unauthorized use.

The RV-Series of vertical compactors are ideal for situations where space may be restricted, the volume of wet waste does not justify a larger system, or a roll-off collection service is not available.

These vertical units are versatile and easy to operate. Their compact design make them ideal for shopping plazas, restaurants, hotels/motels, fast food locations, hospitals, nursing homes, schools, and many more locations. They can either be used on the exterior or the interior of the building.

The vertical compactors are available in 4, 6, and 8 yard capacities. All models are equipped with the Roto-teck control cycle system, allowing for improved compaction and higher load density. This results in less trips for your hauler which translates into savings for you.

Product Features:

- **No spillage**
- **Low maintenance**
- **Space saving layout**
- **Ultra-safe operation**
- **Auto-cycle compacting**
- **Lockable control panel**

Canada's leading manufacturer of waste compaction and recycling equipment
